

# **Placement Empowerment Program**

## ***Cloud Computing and DevOps Centre***

Set Up a Virtual Machine in the Cloud Create a free tier AWS account. Launch a virtual machine and SSH into it.

Name: Harshad S

Department: CSE

## Introduction

The objective of this Proof of Concept (POC) is to explore the process of setting up a virtual machine in the cloud using the AWS Free Tier. A virtual machine (VM) is a crucial component in cloud computing, enabling users to deploy and manage scalable computing resources without requiring physical hardware. This POC serves as a foundational exercise for understanding cloud infrastructure and using AWS EC2 to create a simple and cost-effective computing environment.

## Overview

This POC demonstrates the step-by-step process to:

1. Create a free AWS account.
2. Launch a virtual machine using AWS EC2.
3. Configure and secure the instance with a key pair and a security group.
4. Connect to the VM using SSH from a Windows system.

The project covers basic tasks that are essential for beginners in cloud computing, offering hands-on experience with AWS infrastructure.

# Objectives

- 1. Learn AWS EC2 Basics:** Understand how to create, configure, and launch an EC2 instance.
- 2. Practice Secure Connections:** Use SSH to securely connect to the instance.
- 3. Gain Practical Experience:** Explore the AWS Management Console to manage and interact with cloud resources.
- 4. Understand Free Tier Usage:** Work within the AWS Free Tier to avoid unnecessary costs.

# Importance

**1. Foundation for Cloud Computing:** Understanding how to launch and manage virtual machines is a fundamental skill for cloud practitioners.

**Skill Development:** This POC builds hands-on skills in AWS, including instance management, security configurations, and connecting via SSH.

**Scalability and Flexibility:** Demonstrates how cloud infrastructure allows for rapid deployment of resources compared to traditional setups.

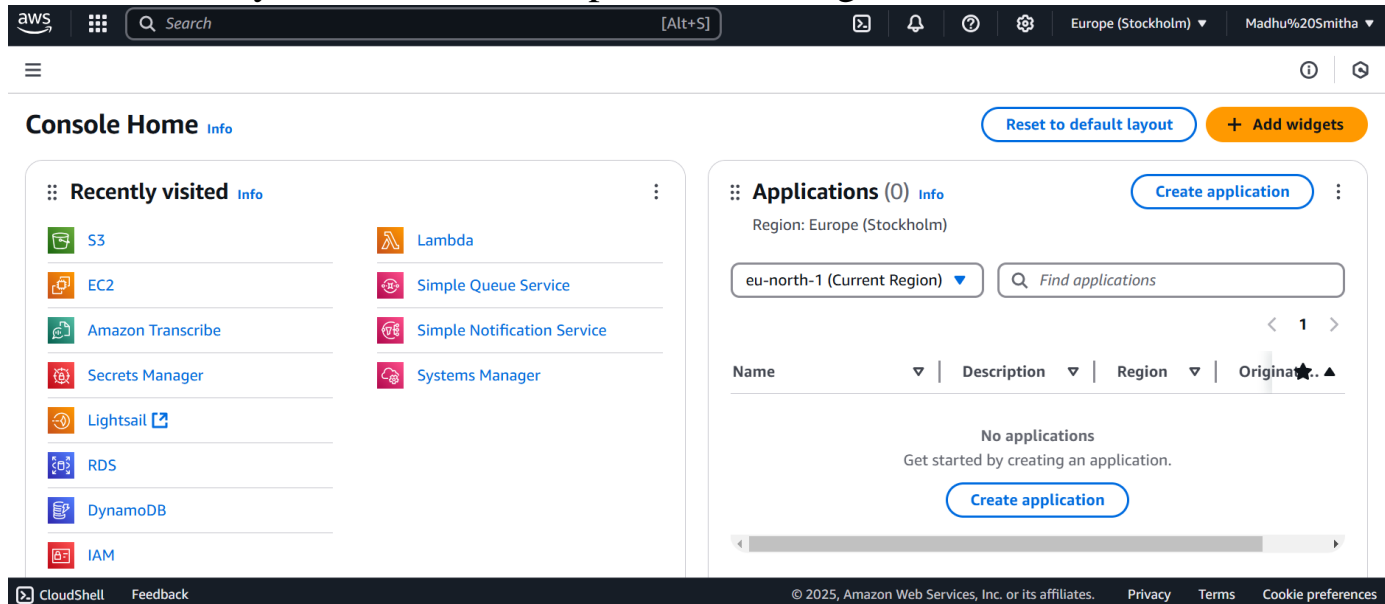

**Cost-Effective Learning:** Using AWS Free Tier enables users to explore cloud computing without financial investment.

**Career Relevance:** Knowledge of setting up virtual machines in AWS is highly valuable for careers in IT, cloud computing, and DevOps.

# Step-by-Step Overview Step

1:

1. Go to [AWS Management Console](#).
2. Enter your username and password to log in.

## Step 2:

Navigate to the AWS Management Console and search for **EC2**.

aws [Search] [Alt+S] Europe (Stockholm) Madhu%20Smitha

Dashboard

- EC2 Global View
- Events
- ▼ Instances
  - Instances
  - Instance Types
  - Launch Templates
  - Spot Requests
  - Savings Plans
  - Reserved Instances
  - Dedicated Hosts
  - Capacity Reservations
- ▼ Images
  - AMIs

**Resources** [EC2 Global View](#)

You are using the following Amazon EC2 resources in the Europe (Stockholm) Region:

Instances (running)	2	Auto Scaling Groups	0
Capacity Reservations	0	Dedicated Hosts	0
Elastic IPs	0	Instances	2
Key pairs	1	Load balancers	0
Placement groups	0	Security groups	2
Snapshots	0	Volumes	2

**Launch instance**  
To get started, launch an Amazon EC2

**Service health**

**EC2 Free Tier** [Info](#)  
Offers for all AWS Regions.

**2 EC2 free tier offers in use**

**End of month forecast**  
⚠️ 0 offers forecasted to exceed free tier limit.

**Exceeds free tier**  
⚠️ 0 offers exceeded and is now pay-as-you-go pricing.

Step 3:

Click **Launch Instances**.

aws [Search] [Alt+S] Europe (Stockholm) Madhu%20Smitha

Dashboard

- EC2 Global View
- Events
- ▼ Instances
  - Instances
  - Instance Types
  - Launch Templates
  - Spot Requests
  - Savings Plans
  - Reserved Instances
  - Dedicated Hosts
  - Capacity Reservations
- ▼ Images
  - AMIs

Snapshots 0 Volumes 2

**Launch instance**  
To get started, launch an Amazon EC2 instance, which is a virtual server in the cloud.

[Launch instance](#)

[Migrate a server](#)

Note: Your instances will launch in the Europe (Stockholm) Region

**Service health** [AWS Health Dashboard](#)

**Region**  
Europe (Stockholm)

**Status**  
✅ This service is operating normally.

**Zones**

Zone name	Zone ID
eu-north-1a	eun1-az1
eu-north-1b	eun1-az2

**Offer usage (monthly)**

Linux EC2 Instances  
736 hours remaining 2%

Storage space on EBS  
29.9 GB remaining 0%

Step 4:

1. Choose **Amazon Linux 2023 Free Tier AMI** or **Ubuntu Free Tier AMI**.

2. Select the **t2.micro** instance type (free tier).

3. Configure security group:

Allow **SSH** (Port 22) from your IP.

4. Add a key pair:

If you don't have one, create a new key pair and download it as a .pem file.

5. Click **Launch Instance**.

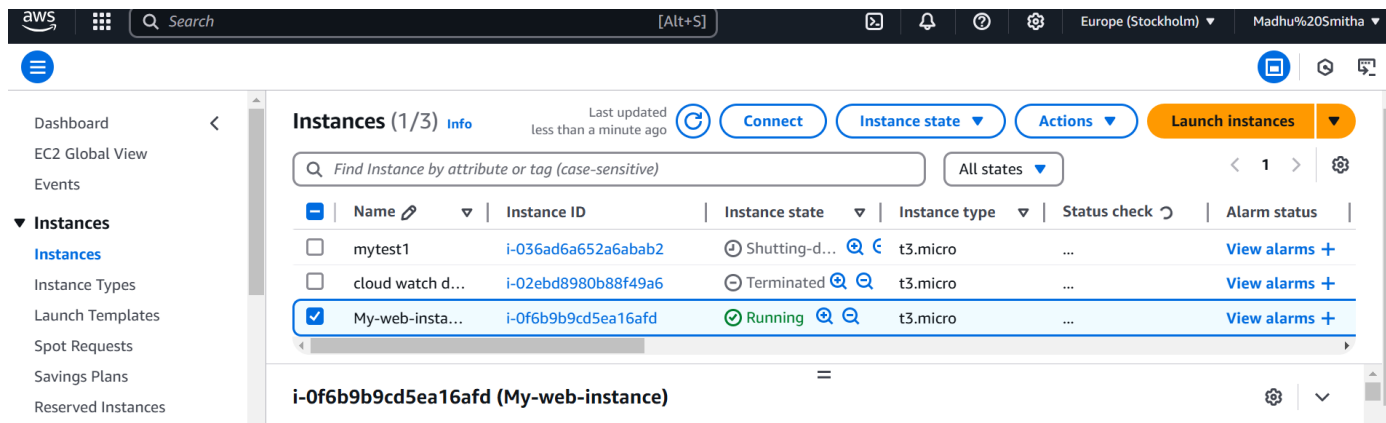

The screenshot shows the AWS Management Console interface for launching an EC2 instance. The top navigation bar includes the AWS logo, a search bar, and user information for 'Europe (Stockholm)' and 'Madhu%20Smitha'. The breadcrumb trail indicates the path: EC2 > Instances > Launch an instance. The main heading is 'Launch an instance' with an 'Info' link. Below this, a brief description states: 'Amazon EC2 allows you to create virtual machines, or instances, that run on the AWS Cloud. Quickly get started by following the simple steps below.'

The configuration is organized into two main sections on the left and a summary on the right. The first section, 'Name and tags', contains a 'Name' field with the value 'My-web-instance' and an 'Add additional tags' button. The second section, 'Application and OS Images (Amazon Machine Image)', includes a description of AMIs and a search bar with the placeholder text 'Search our full catalog including 1000s of application and OS images'. The right-hand 'Summary' panel provides a quick overview of the configuration: 'Number of instances' is set to 1; 'Software Image (AMI)' is 'Amazon Linux 2023 AMI 2023.6.2...' with a 'read more' link and AMI ID 'ami-087fba4aa07ebd20f'; 'Virtual server type (instance type)' is 't3.micro'; and 'Firewall (security group)' is 'New security group'. At the bottom of the summary panel are 'Cancel' and 'Launch instance' buttons, along with a 'Preview code' link.

The footer of the console shows 'CloudShell', 'Feedback', and copyright information for 2025, Amazon Web Services, Inc. or its affiliates, along with links for 'Privacy', 'Terms', and 'Cookie preferences'.

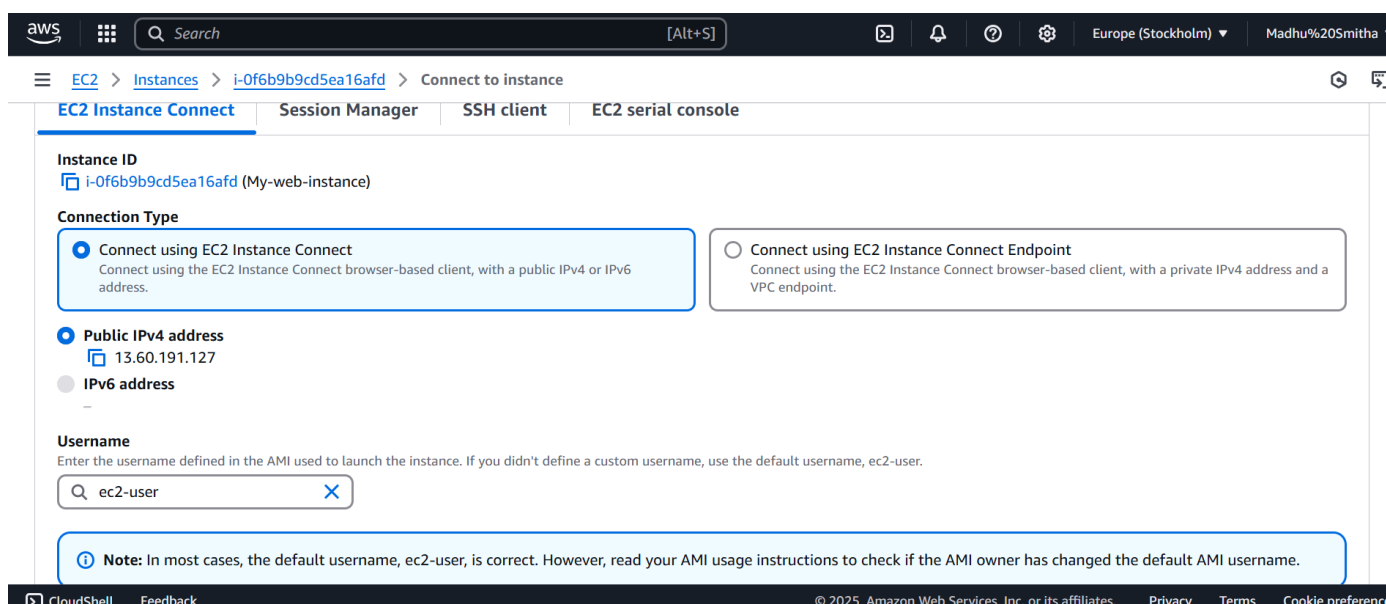

Step 5:

Check your running instance in the Instances section . Select your Instance and click the Connect Option.

## Step 6:

Go to the SSH client section, and copy the command provided under the 'Example' section.

## Step 7:

Open PowerShell, navigate to the Downloads folder. Run the SSH command from the EC2 Connect section, replace the key name with your downloaded key, press Enter, and type yes when prompted.

```
ED25519 key fingerprint is SHA256:RdWq0ML8dfZXc8B1hsVJV1lo+c0HLa7+cFPSfLQ+m8U.  
This key is not known by any other names.  
Are you sure you want to continue connecting (yes/no/[fingerprint])? yes  
Warning: Permanently added 'ec2-13-201-187-19.ap-south-1.compute.amazonaws.com' (ED25519) to the list of known hosts.
```

Successfully completed the setup of a virtual machine in AWS.

## Outcome

By completing this PoC of setting up a virtual machine in AWS, you will:

1. Create and configure a free AWS account to use cloud resources within the Free Tier.
2. Launch an EC2 instance with Amazon Linux or Ubuntu as the operating system.
3. Generate and manage a secure key pair for SSH access to your EC2 instance.
4. Configure a security group to allow SSH connections to your instance from your IP address.
5. Successfully connect to the EC2 instance via SSH using the public IP address.

6. Gain hands-on experience with AWS EC2 and foundational cloud computing concepts.
